## EL MAGNIFICO FROM WEBAK

AUSTRIAN games manufacturer Webak Games introduces its new touchscreen game, El Magnifico.

Following on from Fruit Star Bonus, Bell Scatter, Golden Island and other popular Webak games, the company is now releasing a new creation of its self-developed Linux-based games.

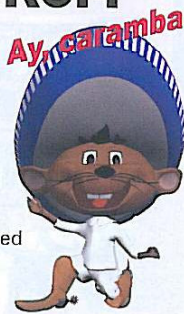

El Magnifico is a five-reel, nine-line game with impressive graphics where the player goes on a journey to ancient Mexico and finds hidden treasure in the bonus games.

The game is available in a dual line cabinet, which includes two 19ins monitors, the lower of which is a touchscreen - something that Webak sees as an important development for the company.

The slimline, metal cabinet has a steel base making it highly secure, and its dimensions of 202cm by 56cm by 54cm means it is easy to integrate into gaming halls and pubs. The clearly arranged interior is easy to maintain.

The machine can be adapted to meet different operator requirements or to comply with all applicable legislations. Different options for the machine include a bill validator, coin acceptor, ticket printer and hopper.

Webak's El Magnifico will be distributed internationally, firstly to the company's major markets such as Germany, Romania and Poland, and then to other countries across western and eastern Europe. IG01

## → What's new in London...

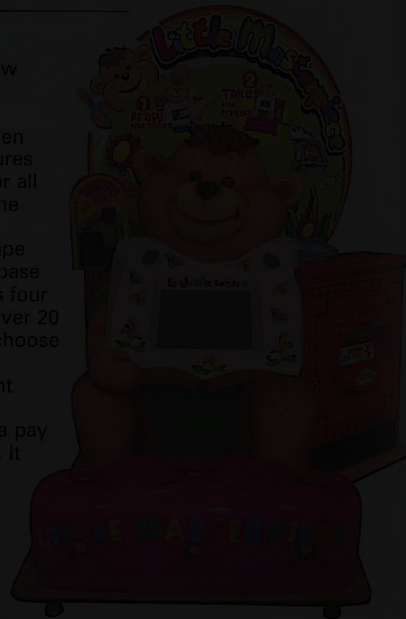

Title → LITTLE MASTERPIECE/CHUCKLES THE CLOWN

Category → NOVELTY/TICKET REDEMPTION

Company → LAI GAMES

LITTLE Masterpiece, the new novelty attraction from LAI Games, allows children to interact with the touch screen LCD monitor to create pictures that can be printed. Ideal for all family locations, the machine features a compact and attractive cabinet in the shape of a bear, durable wooden base with fiberglass seat and has four different play modes with over 20 different image options to choose from. The game has fully operator adjustable payment settings and includes a free printout with every play or a pay per print option at low cost. It also features a HP laserjet printer, can hold up to 500 sheets of Letter or A4 size paper and contains a CD with a pre-printed background image for the printout.

Also from LAI Games is Chuckles the Clown, a new entertaining ticket redemption game that features a bright and colorful clown cabinet and circus sound effects. The object of the game is to accumulate points by placing lightweight colourful balls into the clown's mouth as Chuckles the Clown rotates his head from side to side. The more points a player accumulates the more tickets earned, making it an ideal game for children and a good piece for all traditional amusement locations. IG02

Title → DRAGON BALL BOUNCE/SUPERMOLE

Category → TICKET REDEMPTION/WHACKER

Company → ZHONGSHAN GOLDEN DRAGON

THE newly established Zhongshan Dragon World Game and Amusement Sourcing Platform will attend London along with Zhongshan Golden Dragon Amusement Equipment to exhibit new products Dragon Ball Bounce and Supermole, among other products. Developed by Zhongshan Gold Dragon Amusement, the game has a brand new theme and is simple to play. The player has to direct the ball into the mouth of dragon by balancing the pole. When the ball goes into the turntable, players then have to control the wheel to get big points and collect as many tickets as possible.

Another product is Supermole, an entertaining, addictive and easy-to-play game that has been designed for players to hit the mole with a hammer. Featuring a 32ins LCD and wide-screen image format, it has three themes from which the player can select from. IG03
